

# DREAMER HOUSE

**Mission 2 of 7**

## **A SCHOOL**

We want you to draw a school for us...  
...but this school is not like any other school.

This school has **three classrooms and no playground**. Can you believe it!? This school has one classroom for maths, one classroom for english, and one classroom for science.

The kids who go to this school think school is boring! They don't like maths, english OR science. But we are going to change their mind, all thanks to you.

We want you to **draw all three classrooms**, and each classroom has to **make maths, english and science fun for every kid that walks in**.

What would be on the walls? What would be in the room? What can the kids see, hear, taste, touch and smell?

When you're done, film yourself as you present your drawings. To the camera, explain why each class will help the kids love maths, english and science more.

We can't wait to see your drawings!

Lots of love,  
Dreamer House
